SUMMARY

Aspiring Full-Stack Software Engineer passionate about leveraging technology for conservation. Currently pursuing a Bachelor of Software Engineering at African Leadership University (ALU), with specialized training from the ALU School of Wildlife Conservation. I am eager to gain hands-on experience, collaborate with professionals, and enhance my skills in real-world software development. Enthusiastic about continuous learning and innovation, I am looking forward to developing impactful solutions while growing as a software engineer.

EDUCATION

African Leadership University (ALU) – Kigali, Rwanda
BSE. Software Engineering (May 2024 – June 2027)

PROFESSIONAL EXPERIENCE

Software Development & Algorithm Projects (May 2024 – August 2024)

- Built and deployed an ALU Cafeteria Feedback App as part of a collaborative team project.
- Created multiple landing pages and full-stack applications.
- Developed and optimized solutions for LeetCode challenges, focusing on algorithmic problem-solving.

SKILLS

- Frontend Development: HTML, CSS, JavaScript, React.js, Next.js
- Backend Development: Node.js, Express, MongoDB, APIs, Web Servers (Nginx, Apache)
- Debugging & Optimization: Strong debugging skills, problem-solving, algorithm optimization
- Version Control & Collaboration: Git, GitHub
- Operating Systems: Linux (Ubuntu)
- Teamwork & Communication

EXTRACURRICULAR ACTIVITIES

- Volunteer – International Literacy Day at ALU (September 8, 2024)
- Member – ALU School of Wildlife Conservation
- Member – ALU Robotics Club

HOBBIES & INTERESTS

- Software Development & Problem-Solving
- Playing Piano
- Football (Manchester City Fan)

LANGUAGES

- English (Proficient)
- Kinyarwanda (Fluent)
